SUN-MAR

**POOLSIDE
TOILETS**

● **NO Plumbing** ● **NO Chemicals** ● **NO Odor**

SUN-MAR POOLSIDE TOILETS

SUN-MAR the leader in composting toilets for over 25 years, has developed a unique design to odorlessly decompose waste, and evaporate liquids. A small residue is collected and used as fertilizing soil

SUN-MAR poolside toilets are:

- Odorless
- Need no plumbing
- Use no chemicals
- Economical
- Install quickly and easily
- Are safe and environmentally friendly.

SUN-MAR Poolside Toilet Models

SUN-MAR has developed two special poolside toilets, the Compact and the Excel. Both units work the same way, the difference is in the size of the Bio-drum and hence the capacity

The Compact

The Compact is an elegant low profile unit with the looks to complement any bathroom.

SUN-MAR engineers achieved this effect by developing and patenting a variable diameter Bio-drum which is small at the front and large at the rear.

Regular poolside capacity is 4-5 people, with a short term overload capability of 8.

The Excel

The much larger BIO-DRUM on the Excel gives this unit twice the composting capacity of the Compact. The Excel has been successfully tested by the National Sanitation Foundation (NSF) for 6 months in residential use.

In poolside application the Excel can handle 6-8 people with an occasional short term overload capacity of 12.

Specifications:

	Regular Poolside Toilet Compact	High Capacity Poolside Toilet Excel
Capacity	4-5	6-8
Electrical Max Amps/Average Watts	2.0/125	2.4/150
Unit Dimensions (Inches) Height/Width/Depth	27 1/2 *133/22	32/33/22 1/2
Overall Depth Required to Remove Drawer	45	48
Weight (lbs) Product/Shipping Carton	50/90	60/100
Shipping Carton (Inches) Width/Length/Height	27/36/30	28/36/37

Installation and Start Up

Everything you need for installation and start up is in the box. To install a toilet, merely plug it into a regular 3 pin plug and assemble the 2" vent stack.

To start up a **SUN-MAR** just add half the 8 gallon bag of Compost Sure, and half the Microbe Mix bacteria pouch to the Bio-Drum. Your toilet is ready for use.

Operating a SUN-MAR

Use your **SUN-MAR** just like a regular toilet. Toilet paper needs no special treatment, it is easily decomposed in a **SUN-MAR**.

There are only two things you need to know. Add some bulking material regularly, and turn the handle to rotate the drum every few days. To remove some compost (normally annually), release the lock and rotate the drum backwards. Some compost drops automatically into the finishing drawer.

How We Keep a SUN-MAR Odor Free

The fan at the rear of the unit pulls air in continuously through all openings and up the vent stack so as to maintain a partial vacuum within the unit. This ensures there can be no odor in the bathroom.

Other SUN-MAR Units

SUN-MAR has an extensive range of 23 composting toilets for many applications ranging in capacity from small to large. The line up includes electrical and non electric units, and models with and without water flush. If composting make sense for you, call for **SUN-MAR's** free 24 page catalog at 1-800-461-2461 or check our web site at: www.sun-mar.com
